ANURUDHA   SARKAR

· **Full-Stack Developer (Next.js · Node.js)**

anurudhs567@gmail.com   Malda, India   +91 8918018370   < Portfolio >

SUMMARY

Full-Stack Developer with hands-on experience building and deploying production web apps using Next.js, Node, PostgreSQL & TypeScript. Developed end-to-end projects. Strong practical knowledge of REST APIs, database, and cloud deployment. Available to contribute immediately.

EXPERIENCE

Full Stack Developer   July 2025 – Present
| Freelance · India · Remote

- Implemented Next.js frontend with reusable components, reducing overall code redundancy, also ensuring type safety with TypeScript.

- Built robust Node backend with Prisma (Postgres), designing schemas and REST APIs, ensuring security with custom JWT, Google Oauth.

- Deployed and managed cloud infrastructure, ensuring scalability, backups and cost-efficient operation.

   Key Skills: Next.js, TypeScript, Node, REST APIs, Prisma, PostgreSQL

SKILLS

Language: TypeScript
Runtime & Frameworks: Next.js, Tailwind CSS, Node.js, Express.js, REST API
Database & Cloud: PostgreSQL, MongoDB, Render, AWS

EDUCATION

Maulana Abul Kalam Azad University of Technology, West Bengal
Bachelor of Technology in Computer Science — June 2025   CGPA: 8.02 / 10

The St. Xavier's School
ISC (12th) of   2021   Percentage: 91 %

PROJECTS

Rental — Production-Grade Real Estate Application | *Live*   Aug 2025 — Present

Built a scalable SaaS Next.js rental marketplace with interactive Mapbox maps, advanced property filters for most relevant result, favourites, interactive dashboards, and individual property pages, backed by Node handling leases, applications, and profile management for both tenant & managers portal seamlessly, additionally secured with JWT based authentication for production readiness.

Noted — Minimal Note Taking with Reminder System | *Live*   June 2025 — July 2025

Noted is a mobile-first note-taking app with built in reminder system. Leveraging Next.js, Node, TypeScript, featuring quick-add notes, reminders, profile, search, CRUD, drag-&-drop, minimalist dark UI & custom JWT + Google OAuth authentication. Additionally introduced BullMQ with workers for background jobs to power email reminder system which adds to advanced system.
